**Listing of Claims:**

1. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods, the point of sale tax reporting system comprising:

at least one tax register located at a location of a merchant or retailer ~~location~~, said at least one tax register ~~for processing~~ adapted to process data for a consumer sales transaction data at the merchant or retailer location and ~~computing~~ compute use tax data for the transaction to be indicated to an appropriate state agency based upon at least one of the ~~a~~ location of a ~~the~~ consumer ~~or~~ and a location where the purchased goods are to be shipped, said at least one tax register forwarding said transaction data and said use tax data to at least one of the state agency and a credit card processing company for processing, wherein ~~the~~ a transaction number associated with the transaction is provided by said at least one tax register to the consumer, and said transaction data includes at least an amount of money received by the merchant or retailer from the consumer for the purchased goods;

a computer system including at least a first computer and a corresponding first memory disposed at the state agency, ~~the~~ said first computer and said first memory for receiving and storing the forwarded adapted to receive and store said transaction data and said use tax data forwarded from one of the credit card processing company and ~~a~~ the merchant or ~~at the~~ retailer location; and

a first communication link ~~connecting~~ permitting the connection of at least one of (i) ~~the~~ said at least one tax register at the merchant or retailer location and (ii) the credit card processing company, ~~to the first computer and memory~~ said computer system at the state agency, said first communication link for permitting ~~the~~ said at least one tax register or the credit card processing company to

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

~~forward the said transaction data and said use tax data to said first computer and said first memory so that the said transaction data and said use tax data from the merchant or retailer is automatically forwarded to the state agency and stored in the said first memory in order to help enforce tax laws and prevent at least one of the consumer and the merchant or retailer consumers or merchants from avoiding the payment of a use tax; and~~

~~wherein the transaction data further includes a transaction number, the transaction number enabling the consumer to confirm with a second communication link permitting the consumer to connect with said computer system at the state agency, said second communication link enabling the consumer to input the transaction number to said computer system and receive confirmation from the state agency whether the transaction has been properly reported.~~

2. (currently amended) The point of sale tax reporting system of claim 1, wherein said at least one tax register is adapted to process data for the consumer sales transaction where the consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.
3. (currently amended) The point of sale tax reporting system of claim 1, wherein the said first communication link is one of a digital packet switched network and a satellite network.
4. (currently amended) The point of sale tax reporting system of claim 1, ~~wherein the system includes further including means at the merchant or retailer location means for accessing a the credit card processing company in response to the transaction so that the credit card processing company automatically charges the consumer's a credit card of the consumer with both the a sales price of the purchased goods and a the use tax based upon a destination to which the location where~~ the consumer requests that the purchased goods be shipped.
5. (currently amended) The point of sale tax reporting system of claim 4, further including means for allowing the credit card processing company to forward the use tax charged to the consumer to the state agency whereby, wherein the use

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

tax, where appropriate, is automatically charged to the consumer, and where the use tax includes a sales tax.

6. (currently amended) The point of sale tax reporting system of claim 1, ~~wherein~~ further including means for issuing a tax stamp receipt to ~~a~~ the consumer as evidence of a tax paid for attachment to a parcel.
7. (currently amended) The point of sale tax reporting system of claim 1, further including a connection to a digital data network provided so as to connect to provide for the connection of the merchant or retailer location to a consumer the location where of the consumer is positioned, said digital data network for allowing the consumer to purchase the goods from ~~a~~ the merchant or retailer via said digital data network.
8. (currently amended) The point of sale tax reporting system of claim 1, wherein said first communication link includes the use of at least one of a telephone line, a digital data network, and a satellite wireless communication link.
9. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods over a digital data network, the point of sale tax reporting system comprising:
  - ~~the~~ said digital data network ~~for enabling a~~ adapted to enable the consumer to purchase goods over ~~the~~ said digital data network from a merchant or retailer;
  - at least one of a first computer or and a register located at a location of the merchant or retailer location, said at least one of a first computer or and a register for processing adapted to process consumer sales transaction data at the merchant or retailer location and forwarding forward use tax data and the transaction data for a transaction to at least one of a state authorized entity and a credit card processing company, where wherein a transaction number associated with the transaction is provided by said at least one of a first computer and a register to the consumer, and the transaction data includes at least an amount of money received or to be received by the merchant or retailer from the consumer for the transaction;

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

a computer system including at least a second computer and a  
corresponding memory disposed at the state authorized entity, ~~the said~~ second  
computer and said corresponding memory ~~for receiving and storing forwarded~~  
adapted to receive and store the use tax data and the transaction data forwarded  
from one of the credit card processing company and ~~a the~~ merchant or retailer at  
~~the retailer location; and~~

a first communication link ~~connecting~~ permitting the connection of at least  
one of (i) ~~the said at least one of a~~ first computer ~~or and a~~ register at the  
merchant or retailer location and (ii) the credit card processing company, to ~~the~~  
said second computer and said corresponding memory at the state authorized  
entity, said first communication link for ~~permitting the said at least one of a~~ first  
computer ~~or and a~~ register, or the credit card processing company to forward the  
use tax data and the transaction data to said second computer and said  
corresponding memory ~~whereby, wherein the use~~ tax data from the merchant or  
retailer is automatically forwarded to the state authorized entity and stored in ~~the~~  
said corresponding memory in order to help enforce tax laws and prevent at least  
one of the consumer and the merchant or retailer consumers or merchants from  
avoiding ~~the~~ payment of a use tax; ~~and~~

~~wherein the transaction data further includes a transaction number, the~~  
~~transaction number enabling the consumer to confirm with a~~ second  
communication link permitting the consumer to connect with said computer  
system at the state authorized entity, said second communication link enabling  
the consumer to input the transaction number to said computer system and  
receive confirmation from the state authorized entity ~~agency~~ whether the  
transaction has been properly reported.

10. (currently amended) The system of claim 9, wherein ~~the said at least one of a~~  
first computer or a register computes the use tax data.
11. (currently amended) The system of claim 9, wherein ~~the said~~ digital data  
network includes a packet switched digital data network.

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

12. (currently amended) The system of claim 9, wherein the state authorized entity is a State Treasury or a taxing authority.
13. (currently amended) The system of claim 9, further comprising means for charging a credit card of the consumer for ~~the purchase of~~ purchasing the goods and the use tax due thereon.
14. (currently amended) The point of sale tax reporting system of claim 1, wherein ~~the tax said at least one tax~~ register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
15. (currently amended) The point of sale tax reporting system of claim 1, wherein ~~the~~ said at least one tax register comprises a declining register.
16. (currently amended) The point of sale tax reporting system of claim 1, further comprising ~~means at the merchant or retailer means~~ for causing each of: (a) summaries of transactions to be provided; (b) a summary list of the transactions to be provided; and (c) a checking account of the merchant or retailer to be charged so that money is taken from the checking account of the merchant or retailer based on the said transaction data and said use tax data forwarded to ~~the memory and the first said first computer and said first memory~~.
17. (currently amended) A point of sale tax reporting system in an environment where a consumer purchases goods, the point of sale tax reporting system comprising:  

a tax register located at a location of a retailer, said tax register ~~for processing adapted to process data for a consumer sales transaction data~~ at the retailer and ~~computing~~ compute use tax data for the transaction to be provided to an appropriate state agency based upon at least one of ~~the~~ a location of ~~a the~~ consumer and ~~or a location~~ where the purchased goods are to be shipped, said tax register forwarding said transaction data and said use tax data to at least one of the state agency and a credit card processing company for processing, wherein ~~the~~ a transaction number associated with the transaction is provided by said tax register to the consumer, and said transaction data includes at least an

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

amount of money received by the retailer from the consumer for the purchased goods;

a computer system at the state agency including at least a first computer and a corresponding first memory, the said first computer and said first memory for receiving and storing the forwarded adapted to receive and store said transaction data and said use tax data forwarded from one of the credit card processing company and a merchant at the retailer;

a first communication link connecting permitting the connection of at least one of (i) the said tax register at the location of the retailer location and (ii) the credit card processing company, to the said first computer and said first memory, said first communication link for permitting the said tax register or the credit card processing company to forward the said transaction data and said use tax data to said first computer and said first memory so that the said transaction data and said use tax data from the retailer is automatically forwarded to and stored in the said first memory in order to help enforce tax laws and prevent at least one of the consumer and the retailer consumers or merchants from avoiding the payment of a use tax; and

means for causing at the retailer for causing each of: (a) summaries of transactions to be provided; (b) a summary list of the transactions to be provided; and (c) a checking account of the retailer to be charged so that money is taken from the checking account of the retailer based on the said transaction data and said use tax data forwarded to the said first computer and said first memory and the first computer; and

wherein the transaction data further includes a transaction number, the transaction number enabling the consumer to confirm with a second communication link permitting the consumer to connect with said computer system at the state agency, said second communication link enabling the consumer to input the transaction number to said computer system and receive confirmation from the state agency whether the transaction has been properly reported.

Application No. 09/195,105

18. (new) The system of claim 17, wherein said tax register is adapted to process data for the consumer sales transaction where the consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.
19. (new) The system of claim 17, wherein said first communication link is one of a digital packet switched network and a satellite network.
20. (new) The system of claim 17, further including a digital data network provided so as to connect the retailer location to the location of the consumer, said digital data network for allowing the consumer to purchase the goods from the retailer via said digital data network.
21. (new) The system of claim 17, wherein said tax register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
22. (new) The system of claim 17, wherein said computer system further includes a verifying computer connected to said first computer, said first memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
23. (new) The point of sale tax reporting system of claim 1, wherein said computer system further includes a verifying computer connected to said first computer, said first memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
24. (new) The system of claim 9, wherein said computer system further includes a verifying computer connected to said second computer, said corresponding memory, and said second communication link, said verifying computer adapted to receive the transaction number from the consumer and send confirmation to the consumer that the transaction has been properly reported.
25. (new) The system of claim 9, wherein said at least one of a first computer and a register is adapted to process data for the consumer sales transaction where the

Application No. 09/195,105  
Amendment dated March 23, 2009  
Reply to Office Action of September 23, 2008

consumer purchases the goods with one of a credit card, a debit card, and any form of electronic payment.

26. (new) The system of claim 9, wherein said first communication link is one of a digital packet switched network and a satellite network.
27. (new) The system of claim 9, wherein said at least one of a first computer and a register comprises a PC-based point-of-sale system including a keyboard, a credit card reader, a bar code reader, and a receipt printer.
